S M NABIL AUSAF

Student of CSE Department

About Me

I am a dedicated Computer Science Engineering student with a strong foundation in software development, algorithms, and data structures. Passionate about leveraging technology to solve real-world problems, I have hands-on experience in programming languages such as Python, Java, and C++, and I am continually expanding my knowledge in areas like machine learning, web development, and cloud computing. I am a quick learner and enjoy collaborating on projects that challenge my problem-solving skills. My goal is to contribute to innovative solutions that enhance user experiences and drive technological advancements.

PROJECT

Hostel Management System:
The Hostel Management System, developed in C, is a console-based application that manages student registration, room allocation, and fee processing. It features user authentication, record management, and report generation using file handling for data storage, enhancing operational efficiency and streamlining hostel administration.

Language Used: C

EDUCATION
